

**Introduced by Senator Negrete McLeod**

February 23, 2007

---

An act to amend Section 10631.5 of the Water Code, relating to water.

**LEGISLATIVE COUNSEL'S DIGEST**

SB 1030, as introduced, Negrete McLeod. Water: urban water suppliers.

Existing law requires every urban water supplier to prepare and adopt an urban water management plan, as prescribed. Existing law requires an urban water supplier to submit a copy of its plan to, among others, the Department of Water Resources. Existing law requires the department to take into consideration whether the urban water supplier is implementing the water demand management activities that the urban water supplier identified in its urban water management plan in evaluating applications for grants and loans made available pursuant to the certain provisions of the Costa-Machado Water Act of 2000.

This bill would make a technical, nonsubstantive change to the requirement that the department take into consideration whether the urban water supplier is implementing the water demand management activities that the urban water supplier identified in its urban water management plan in evaluating applications for grants and loans made available pursuant to the certain provisions of the Costa-Machado Water Act of 2000.

Vote: majority. Appropriation: no. Fiscal committee: no.  
State-mandated local program: no.

*The people of the State of California do enact as follows:*

1     SECTION 1. Section 10631.5 of the Water Code is amended  
2 to read:  
3     10631.5. The department shall take into consideration whether  
4 the urban water supplier is implementing, or scheduled for  
5 implementation, the water demand management activities that the  
6 urban water supplier identified in its urban water management  
7 plan, pursuant to *the requirements of* Section 10631, in evaluating  
8 applications for grants and loans made available pursuant to Section  
9 79163. The urban water supplier may submit to the department  
10 copies of its annual reports and other relevant documents to assist  
11 the department in determining whether the urban water supplier  
12 is implementing or scheduling the implementation of water demand  
13 management activities.
